Subject: Advice on a Few Radios  
To: ham-equip@ucsd.edu

After some off-line help I am much closer to a decision on a radio unit  
for myself. I would appreciate it if anyone would give me comments on any  
of the following radios, any comparisons or recommendations. Your help is  
appreciated in advance.

The radios are:

Yaesu FT-23R  
Azden AZ-21A  
Standard C188A  
Alinco DJ-F1T

I am still getting prices on a couple of these so that could explain a  
problem. I will be using the radio at home to log into a net and as an  
intergroup communication device in the field (both from my car and with a

heavy pack on my back in all sorts of terrain). I will be primarily on 2m frequencies in the range 143.750-149.925, although I would like to be able to at least listen to 121.600 and 121.500. The frequencies are of course in MHz. Listening to aircraft frequencies is a real plus but non-essential. In the field I could be gone for extended periods of time.

Thans alot,  
Christopher

To: ham-equip@ucsd.edu

I am looking for info on the following pieces of military surplus gear:

- 1) AM-4213/FLR-9(V)
- 2) AM-4531/GR

For the first I am looking for any kind of information. I was given this item and it looks potentially useful. For the second I am looking for a schematic, or other technical information. (I know it is a VHF amplifier and I'd like to be able to use it on 2M.)

To: ham-equip@ucsd.edu

I bought this radio at a garage sale and did not get all the necessary information on how to use it. I would be glad if someone could provide some hints on how to use it as well as some hints on the dates it was manufactured and its performance. Any info will be greatly appreciated.

Subject: Yaesu FT411E Mods  
To: ham-equip@ucsd.edu

Looking for mods to Yaesu FT-411E, particularly to allow access to marine VHF bands. For intellectual curiosity only, of course.

Thanks...

Don
